Size: CTS

Quantity: Approx. 15,000 m²

Located at the center of West Manhattan and designed by Kohn Pedersen Fox and Elkus Manfredi Architects, this seven-story mall is home to more than 100 diverse shops and restaurants.

The MGI Group fabricated and supplied approximately 15,000 m² of its Lapys Grey® marble in 3 cm polished rectangular and trapezoidal pieces for the entire five commercial floors. The architect chose a special pattern made of unique pieces with directional vein which could not be exchanged with each other, thus creating an outstanding effect.
