Year of completion: 2012

Location: London, UK

Material: Calacatta Caldia® honed

Thickness: 2, 3, 7 and 18 cm

Size: CTS

Quantity: Approx. 100 m²

Located between Knightsbridge and Belgravia in London, it is famous for its beautiful Portland stone faced Grade II listed buildings. Recently it has been modernised and refurbished with great flair by Clare Norrish Interiors. The Calacatta Caldia® marble - supplied by the MGI Group - is a precious material that combines elegance and resistance. The honed finishing is pleasantly soft and velvety to touch. With its satin look, it offers a great refinement and it is much more resistant to scratches, for this reason it is suitable for "lived in" surfaces.
