*Quantity: Approx. 80 m²*

Irving Sherwood Wright Center on Aging is part of New York Presbyterian Hospital located in the Upper East side, Manhattan. It is the Division of Geriatrics and Palliative Medicine dedicated to providing older adults with comprehensive care.

The MGI Group supplied its Perlato Sicilia Cofano® marble that perfectly fits with the beautiful warm beige palette of the interiors. The combination of pastels and brown shades looks very welcoming and conveys a sensation of calm and tranquillity.
