*Quantity:* Approx. 130 m<sup>2</sup>

One Manhattan Square is the tallest building by far on the Lower East Side, revitalizing the area. This residential building also includes a pool and a Spa as well as an amenity room characterized by a miniature garden in the middle, marked by a sense of private experience.

The floor around the garden is covered with honed Statuario Caldia® marble. Due to its nature, marble is the perfect stone to be used in aquatic environments such as swimming pools hallways thanks to its strength, resistance and safety combined with the elegance of the design, the purity of the lines and the solidity of the whole.
