THE PROJECT

The three parallel universes of Art, Architecture and Design find their meeting point. The marble is no longer considered heavy but fluid and dynamic thanks to the work of great professionals who are able to interpret material belonging to Italian art history in innovative ways.

The starting point is a cube of 30cm³ of CALDIA marble. 3 artists, 3 designers and 3 architects have two months to develop an idea and one month to produce an object that will be part of a limited edition of 5. For the design of their works the artists were completely free, had no limit, if not the cube and its physical limits.
