Material: Statuario Caldia® True White honed

Thickness: 1 and 2 cm

Size: CTS and columns

(with 1,854 and 1,321 inch mm radius)

Quantity: Approx. 2,000 m²

Midtown Manhattan's most extraordinary new skyscraper, One Vanderbilt offers an unprecedented combination of spectacular views and high-profile global visibility, as the second tallest NYC office building, next to Grand Central Station. Designed by Kohn Pedersen Fox Associates, the Statuario Caldia® True White honed marble is the choice for the 2 lobbies, 3 corridors, the elevator cabs and the 7 majestic marble columns. Each of them reaches up to 15 meters high with a diameter of about 2 meters and inclinations that goes from 1 to 3 degrees, following the profile of the main facade of the building. As decorative elements made in MGI factory directly from massive pieces the columns enhance the elegant lobby.
