09 May 2023

MGI AND MARMI GHIRARDI TOGETHER AGAIN AT "XIAMEN INTERNATIONAL STONE FAIR".

The world's largest professional stone exhibition in China, from 5 to 8 June 2023.

Two excellences of the "made in Italy" **stone industry** return as leading players of one of the most important international exhibitions dedicated to natural stone, eagerly awaited after three years of restrictions due to the pandemic and travel restrictions.

MARMI GHIRARDI, a company from Brescia that in 2023 celebrates its 85th anniversary of foundation, and **MGI - MARMI E GRANITI D'ITALIA**, a company from Massa Carrara that has also reached the brilliant threshold of 75 years of activity, both over the years have developed **solid and profitable business relations with China**, where the traditional business model linked to the physical fair is back. **MGI will be present with its own area (HALL 5 - Booth A50042) next to the one of GHIRARDI (HALL 5 - Booth A50041).**

Entrambe presentano i propri materiali - estratti in Cave di Proprietà - e la specializzazione nella realizzazione di progetti in pietra naturale di alto profilo, sottolinea anche l'appartenenza al Consorzio **PNA – Pietra Naturale Autentica**, di cui hanno recentemente sottoscritto il manifesto "**Naturalmente sostenibile**", un decalogo che indica in modo preciso obiettivi e impegni per la promozione e la tutela del marmo in chiave ecologica e sostenibile, altro aspetto strategico. Both will be presenting their materials - extracted in their own quarries - and their specialisation in the realisation of high-profile natural stone projects, also underlined by their membership of the net **PNA - Pietra Naturale Autentica** (Authentic Natural Stone), to which they have recently signed the "**Naturally Sustainable**" manifesto, a decalogue that precisely goals and commitments for the promotion and protection of marble in a sustainable way.

According to export data for the first 10 months of 2022 processed by the CONFINDUSTRIA MARMOMACCHINE Study Centre, Italy has confirmed its position as the 1st destination market for raw Made in Italy stone materials, with 152 million euros of imports from Italy, but also the 18th destination market for processed and semi-finished stone products, with imports worth close to 18 million euros.

So it is important to be present at this event for which Confindustria Marmomacchine has gathered an important delegation of Italian companies to develop new opportunities, a business that in the first 10 months of 2022 saw the Asian giant rank among the top 20 destination countries with purchases of Italian stone technologies close to 12 million euros.
