12 June 2023

MGI GOES BACK TO THE EAST FOR "BIG 5 CONSTRUCT EGYPT".

From 19-21 June, we are attending the most influential event in the construction and infrastructure sector in Egypt.

MGI - MARMI E GRANITI D'ITALIA, a company from Massa Carrara that has reached the brilliant threshold of 75 years of activity in the stone industry, will be present at Big 5 Construct Egypt (**HALL 1 - Booth 1149**) as part of the ICE Agency for the promotion abroad and internationalisation of Italian companies collective exhibition, which will be held in **Cairo, from 19 to 21 June 2023**.

Innovation, craftsmanship, and eco-sustainability: these are the key words that guide MGI, which is presenting itself at the event with the objective of making an ever wider audience familiar with the marbles extracted in its own quarries: from the precious and unmistakable Statuario Caldia® and Calacatta Caldia® to Bianco Carrara and Lapys Grey®, from Perlato Sicilia Cofano® to Riviera Beige®, from Botticino Classico® to Verde Issorie®, all represent the quintessence of the "Made in Italy" brand as a symbol of beauty, excellence, and unparalleled reliability. And they are evidence of the ambition to enhance the image of Italian marble by offering products of superior quality.

The **construction business in Egypt** seems destined for **another year of growth** driven by the urbanisation needs of the country, despite the disruptions in the material supply chain. Indeed, a compound annual growth rate of 6.6 per cent is expected between 2023 and 2025, and production will reach USD 44.34 billion by 2025. Given the large population and the need to modernise the country's infrastructure system, there are several opportunities for long-term projects in the construction sector. Egypt also has the advantage of being an attractive market in the MENA region for international investors. The European Bank for Reconstruction and Development has invested more than USD 9.2 billion in 144 projects across the country, including the upcoming Alexandria Metro project. An opportunity, therefore, not to be missed, with great visibility. The last edition (2022) was attended by some 300 exhibitors from 21 countries, covering an area of 20,000.

"We believe that the construction industry as a whole must be in line with sustainable development that puts human well-being and environmental protection first. This is our focus, and we have also just concluded with the PNA network the first LCA study of the Italian natural stone field, which shows that the impact of stone slabs on climate change is competitive under the banner of certified sustainability", says Paolo Agonigi, CEO MGI.
